DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claim 28 is finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim reclaims a notch that is already claimed in claim 26, from claim 28 depends.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35
U.S.C. 102 that form the basis for the rejections under this section made in this
Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1, 2, 4, 18, 20, 21, 24, 25, 30, 31 and 41 are finally rejected under 35 U.S.C. 102(b) as being clearly anticipated by any of Stratman, Sarvie(697) or Bothum as all show two single piece members with handle and jaw portions with a clamp bar on one member extending into an opening in the other member with the opening upper and lower surfaces providing a guiding means, and a brake lever pivotally engaged within a notch formed in the other member.

Art Unit: 3723

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 5, 6, 8-10, 14, 15, 17, 22, 23, 26-29, 32, 33, 39 and 40 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over any of Stratman, Sarvie(697) or Bothum in view of Wolff et. al..

Any of Stratman, Sarvie(697) or Bothum shows the claimed invention except for the use of a plastic material of construction. Wolff et. al. suggests that a pliers type of clamp can be made of a plastic material to allow it to be flexible. It would therefore be obvious to one skilled in the art at the time the invention was made to modify any of Stratman, Sarvie(697) or Bothum by making any of them of a plastic material to make them more flexible because Wolff et. al. suggests the use of such a material in the manufacture of clamps or pliers.

7. Claims 11 and 13 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over any of Stratman, Sarvie(697) or Bothum in view of Wolff et. al. as applied to claims 5, 6, 8-10, 14, 15, 17, 22, 23, 26-29, 32, 33, 39 and 40 above, and further in view of any of Hersey, McGuckin of Reiter.

Any of Stratman, Sarvie(697) or Bothum, as modified by Wolff et. al., shows the claimed invention except for the use of a spring biased jaw portion.

Art Unit: 3723

Any of Hersey, McGuckin of Reiter suggests that a clamp or pliers can have such a spring biased jaw portion to provide the tool with more flexibility. It would therefore be obvious to one skilled in the art at the time the invention was made to modify any of Stratman, Sarvie(697) or Bothum by using a spring to bias a jaw portion because any of Hersey, McGuckin of Reiter suggests the use of such a spring to bias a jaw portion on the same type of tool.

Response to Arguments

8. Applicant's arguments filed 04 January 2004 have been fully considered but they are not persuasive.

Applicant has argued that none of the primary references show a notch, however in Stratman, especially figures 4 and 5, there is clearly shown a locking lever 11 that is pivotally received within a "notch" 18. Sarvie clearly shows a "notch" in the member 84 in figure 13 and opening 29 in figure 1, which also receives the locking lever 85 or 30, respectively. In Bothum, clearly the U-shaped end portion 25 with opening 26 is a "notch" and it also receives the locking lever 27. Thus contrary to applicant's argument, each of the primary references show the use of a locking lever on a pliers tool that is pivotally received within a "notch" in one of the handles.

As the remaining arguments are solely based on applicant's assumption that the primary references do not have a "notch", the will fall within the above remarks.

Art Unit: 3723

Conclusion

9. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James G. Smith whose telephone number is 703-308-1746. The examiner can normally be reached on M-Th (7:05- 4:35) Fri. off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J. Hail, III can be reached on 703-308-2687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
